## Rental Air Handling Unit

**Model: ACS 160/120**

**Cooling Capacity: 160kw Heating: 120kw**

**Professional, fully winterised climate control units in portable lifting frames. Need your space heating or cooling? These units put you firmly in control of your working environment.**

Purpose made air handling unit hire. These machines offer un-paralleled control of the working environment. Used in conjunction with water chillers for cooling and fitted with on board electric heater banks, the units feature sophisticated controls to maintain exact control of space temperatures. High volume, high pressure fans get the air where you need it, either directly or through flexible ducting- can be supplied with air-sock fabric ducting systems.

#### Features:

- Fully automated control of heating and cooling to set-point
- On-board electric heating, chilled water cooled.
- Powerful high volume fan with filters fitted. 500mm duct con.

#### Applications:

- Large scale space climate control- including; Exhibitions- events- concerts-storage and production areas  
 Film/ Television set, sound stage cooling/ climate control

| Technical Specification        |          | Physical specifications      |           |
|--------------------------------|----------|------------------------------|-----------|
| Cooling cap @ 27Deg air on, db | 160      | Weight (kg)                  | 3500      |
| Heating cap @ -5Deg air on, db | 120      | Height (mm)                  | 2250      |
| Maximum unit amps              | 185      | Width (mm)                   | 2550      |
| Air volume, m3/ hr             | 17,500   | Length (mm)                  | 2190      |
| Heating type, stages           | Elect, 3 | Sound pressure, dB(A) 10-12  | Not/avail |
